

# BORIS PLAYS BLACK

....or White ....or both

Expert or novice the challenge is yours with BORIS... Computer Chess. Mind game technology for in-home use.

- **Programmable Timer** — Allows adjustment of the level of play to match player skill. As time is increased, the level of play improves.
- **Programmable Positioning** — Allows you to position the chess pieces at any starting positions. Very handy for mid-game strategy study.
- **Handicapping** — Particularly handy for beginners. You may program Boris to spot (remove) any piece you wish for handicapping.
- **Illegal Moves** — Boris checks for illegal moves and rejects them by stating "ILLEGAL MOVE".
- **Alpha-numeric Display** — An 8 digit alpha-numeric display allows full rank display and allows Boris to talk to you. Examples: "BORIS PLAYS BLACK", "ILLEGAL MOVE", "GOOD MOVE", "HAVE YOU PLAYED BEFORE", "CONGRATULATIONS", ....etc.
- **Standard Notation** — Boris uses standard chess notation.
- **Castling** — Boris both castles and recognizes castling.
- **En Passant** — Boris both recognizes and uses En Passant.
- **Queening** — Boris automatically queens when the pawn reaches the 8th rank.
- **Color Selection** — Boris can play black or white or both. Yes, Boris can even be made to play himself.
- **Rank Display** — Boris displays pieces in each rank as symbols rather than numbers, making editing easy. Recognizable at a glance.
- **Player in Check** — Boris denotes CHECK by displaying "CH" in the seconds location.
- **Player in Checkmate** — Boris denotes CHECKMATE by displaying "MT" in seconds location.
- **Varied Play** — Boris does not follow a set pattern or make the same moves each time. His program is designed to choose from the best moves he can find in the amount of time he is given.
- **AC Power** — Boris operates on only 8 watts of 117VAC Voltage. No batteries to leak, run down or replace.
- **Warranty** — Boris has a 90 day limited warranty.
- **Handcrafted Case** — Solid walnut, hand rubbed case. Chessboard and chessmen included.
